

Rocks are so basic
Just apart of our everyday lives
No one ever stops to think about how rocks really influence our lives

Rocks

Can be plain
Can be boring
Nothing special about them

Diamonds

Rocks under intense heat
Forms something beautiful
Represents eternal love

Foundation

Rocks put together to form cement
Families can live happily together knowing their house is sturdy

Mountains

One big rock
Somehow simple and beautiful
A place of nature and peace

Red Rocks

Stains your clothes, but most don't care
Close to home

Sometimes we are blinded by everything else around us

We forget to remember the little things
The little things that make the earth truly great
Rocks can be ugly and useless
But they can also bring earth some of the greatest joys
